Mayor

FOREWARD

I am pleased to commend to your reading this comprehensive report for the year 2002, one of the most progressive years in the history of the City of Harrisburg since we were first incorporated as a municipality in 1791.

Harrisburg has come a long way from when it was listed in the first half of the 1980s as the second most distressed city in the United States. There remains a great deal more to be done, and this annual report is issued as a means to identify our progress through the activities, projects and operations of the City of Harrisburg. Such a report as this is issued for each department of city government under the Mayor's authority.

Every city employee and each city agency are integral to the success of Harrisburg. The work and achievements of the current era have written a new chapter in the Capital City's and region's history and, for this, every city employee can take pride and credit.

The City of Harrisburg's government is the most diverse municipal government in Central Pennsylvania. Our services and operations range from the traditional large municipal functions related to police, fire, public works, and parks and recreation to the more unique, such as water, sewer, trash collection, solid waste incineration, energy generation, recycling, economic development, areawide data processing systems, contracted sludge processing, codes enforcement and conducting major special events. Intertwined into all these functions are the administrative support functions related to risk management, legal, data processing, personnel, purchasing, billing, debt collection and financial management services. Everyone's role is important and everyone contributes to the overall success and functioning of this city.

This past year has considerably added to the overall positive performance of this government in achieving major public policy goals. For example:

- (1) The Part I crime rate, considered to be the index by which crime is measured in communities, has dropped over 54% since 1981 and the crime rate is now at a 30 year low;
- (2) The fire rate, meaning the number of fires per year, has dropped over 76% since 1982, and is now at its lowest level since citywide records have been kept;

- (3) The number of businesses on the city's taxrolls, counted at 1,908 by the end of 1981, is now 5,976, the highest number ever recorded;
- (4) The taxbase, assessed at \$212 million in 1982, is now over \$1.6 billion, the highest level ever recorded in city history;
- (5) During the period of 1995 through 2002, the City broke the record four times for the amount of new economic development investments, setting new record levels in city history; in the current era, over \$3.1 billion has been invested in Harrisburg, also a new record for any similar time period in city history, even when adjusting for inflation; the year 2002 was our highest year ever, with \$269.7 million in new investment;
- (6) The annual cost of living index consistently lists Harrisburg as being one of the most affordable communities in the midstate in which to own a home;
- (7) The City, in 2002, for the fifteenth consecutive year, won the nation's top national award for financial reporting and accounting and, additionally, for the twelfth consecutive year, won the nation's top national award for budgeting; of over 2,560 municipalities in Pennsylvania, only 2 have attained the same status;
- (8) The City, in 2002, for the fifteenth consecutive year, retained Tree City U.S.A. status, the highest community conservation award in the nation; and recently, City parks and recreation activities and programs garnered over 30 international, national and state awards; the city's Advanced Wastewater Treatment Plant won first place in Pennsylvania in statewide operational, maintenance and safety competition amongst other plants; the Harrisburg History Project, which includes the placement of pedestrian-level placards marking city historic sites, received the Historic Harrisburg Association's Preservation Award; the City's Melrose Gardens Housing Project received the prestigious Bellamy Award from the Pennsylvania Housing and Redevelopment Agencies' Association, their highest recognition;
- (9) The City and region were selected by the state Chamber of Business and Industry as Pennsylvania's Outstanding Community for the year 2002, marking the second time Harrisburg has won the state's most prestigious municipal honor. Harrisburg was also selected as Pennsylvania's Outstanding Community in 1990.
- (10) The City retained National Police Accreditation, the highest recognition for law enforcement in the nation; of over 21,000 police agencies, only 443 have attained the same status;
- (11) The City attained top national and state awards for its transportation infrastructure improvements, its energy conservation efforts, its historic rehabilitation projects and a myriad of other City pursuits, making the City of Harrisburg the most award-winning municipality in Pennsylvania; the city's Vehicle Maintenance Center and its Director received the top international award from the Association of Fleet Administrators for the city's innovative vehicle purchasing program, which cuts vehicle purchase costs by 10% to 15% and has thus far saved the city and its fellow participating municipalities over \$6 million in reduced vehicle purchase costs;
- (12) Harrisburg continued to be one of the leading cities in the country in the creation of alternative energy and revenue sources; thus far, in the current era, the City has generated over 15.3 billion pounds

of steam, co-generated over 903 million kilowatts of electrical energy, saved over 9.6 million cubic yards of landfill space and produced energy equivalent to over 870 million gallons of foreign oil;

(13) The City has fully or partially funded projects that have resulted in new construction or restoration of over 5,000 residential units, in the form of homes and apartments, making Harrisburg the largest residential developer in Central Pennsylvania;

(14) Additional upgrades have occurred in the Harrisburg Parks System, now the largest municipal parks system in the Midstate and the only municipal parks system to play a continuous regional role; the City has invested over \$68 million in parks and playgrounds since 1982;

(15) Attendance figures continue to show Harrisburg as a dynamic center for recreation, arts and entertainment, with over 2.3 million in attendance for the city's various free, regional special events. The Harrisburg Senators again surpassed the quarter million attendance mark with 283,661 fans in 2002, a new annual record, and are now well over the 3.75 million mark in total attendance, and the Harrisburg Heat have drawn more than 1.2 million fans during their tenure at the State Farm Show Complex.

(16) Citywide neighborhood recreational programs attracted their largest annual attendance ever, with 571,688 attendance in 2002, a 5% increase over 2001, and a dramatic 19% increase since 2000;

(17) The City continued in its Class 7 designation under the National Flood Insurance Program; only three other municipalities in the Nation have an identical or better designation; the classification is the result of the City's floodplain management and emergency management programs; Harrisburg is the only municipality in Pennsylvania to be upgraded in its classification, and in Harrisburg's case, was upgraded three times, giving City property owners a 15% reduction in the base premium for flood insurance;

(18) The City's Fire Bureau is one of 27 Federally-designated Urban Search and Rescue teams, one of the groups available for deployment anywhere in the U.S. for a major national disaster; further, the Commonwealth of Pennsylvania contracted the City to serve as administrator of Pennsylvania Task Force One, which involves resources from across and outside the state, to respond to such emergencies; the City of Harrisburg and the state Task Force were the first team deployed to the World Trade Center on September 11, 2001, in response to the worst terrorist attack in United States history;

(19) In conjunction with its operation of Task Force One, the City has constructed a new Special Operations Center that now serves as the headquarters and staging center for the Task Force and other specialized emergency operations.

(20) As a result of the success of the first Task Force, a second Intra-State Task Force, for response solely within Pennsylvania, has been created by the State. Additionally, the Water Rescue Strike Team One, a sophisticated new marine rescue unit capable of handling water-related emergencies anywhere in the State, is now operational. Harrisburg administers both of these recent additions to the Pennsylvania Emergency Management System.

(21) In the area of community services, Harrisburg continues to be the most engaged municipality in the region in matters of affordable housing and sheltering the displaced. As a result of joint effort by the City, County and human service providers, a second major grant—for \$1,088,000—was secured for both short-term shelters as well as intensive homelessness abatement and prevention.

(22) City coordination and support have resulted in over 225 city blocks being adopted under the Adopt-A-Block beautification program, and another two dozen vacant lots are similarly cared for under the Adopt-A-Lot program; 29 citizens have been trained as citizen codes inspectors to assist city Codes Enforcement Officers, and over 200 citizens have now graduated from the city's innovative Citizens Police Academy, the first of its kind in the midstate; more than 100 city blocks and neighborhoods are now covered by neighborhood crime watch groups;

(23) On a daily and continuous basis, City agencies and personnel performed thousands of services and tasks, for which neither recognition nor attention were provided, but all of which served to enhance the quality of life in Harrisburg with benefit to citizens, businesses and visitors.

(24) The Commonwealth of Pennsylvania has committed \$12 million to the planned new city university, Harrisburg Polytechnic Institute, and the Institute's Preparatory School and Business Incubator will soon open in a restored 83,000 sq. ft. former vacant site in the 200 block of Market Street. More than \$9 million in renovations are currently underway in the former YWCA site.

All should know and understand that American cities continue to face major challenges, frequently involving forces and factors over which a local government has no control. Our gains here have been the result of vision, struggle, persistence and arduous effort. The resurgence of Harrisburg in the current era has reversed previous decades of decline but we, too, are subjected to the unique burdens which the Nation and region place solely upon cities. It remains critically important that each of us rededicate ourselves to the furtherance of Harrisburg's best interests as we carry forth our respective roles and duties. The collective and individual efforts of Harrisburg's employees have made history. We owe it to the people we serve to build upon our present day progress by continuing our commitment to a constant, daily effort to be the best at what we have been hired to do for this City.

To the citizens and taxpayers of Harrisburg we dedicate this comprehensive annual report and our full measure of devotion in the days ahead.

A handwritten signature in black ink that reads "Stephen Reed". The signature is stylized with a large, looped "S" and a cursive "Reed".

Stephen R. Reed
Mayor

The City of Harrisburg, Pennsylvania, Incorporated March 19, 1860

717-255-6448 FAX

Department of Public Safety
Office of the Fire Chief
April 2002

I am pleased to submit the 2002 Annual Report for the Harrisburg Bureau of Fire.

For the third consecutive year zero fire deaths occurred in Harrisburg.

A 95 foot KME Tower Ladder with a pump and a 83 foot KME Tower Ladder were placed in service. They replace two older Tower Ladders.

The Emergency Operation Center was relocated to a larger facility with greatly enhanced computer and graphic information systems.

The Fire Bureau's Public Fire Education Division introduced the all hazard Risk Watch Program to grades K thru 8 in all Harrisburg Public Schools.

The Juvenile Fire Setters counseling program was expanded to provide service throughout the South Central Pennsylvania region. Funding from the County Commissioners Association, the Office of State Fire Commissioner and State Farm Insurance made the program expansion possible.

The Special Operations capability of the Fire Bureau were expanded during 2002. Pennsylvania Water Strike Team One was formed. Strike Team One is made up of members of the Susquehanna Township Rescue Fire Company No. 1, Community Life Team River Rescue and the Harrisburg Bureau of Fire. The Strike Team received a \$150,000 State Grant to purchase equipment and improve swift water rescue training. This has resulted in a greatly increased water rescue capability and an asset that is capable of being deployed statewide.

A Special Operations Facility is under construction and will be completed in May 2003. This facility will house PA Task Force 1, the Dauphin County Police Tactical Team, the Dauphin County Hazardous Materials Response Team and other special operations units.

The Fire Bureau has increased training, planning, and has purchased new equipment to increase our ability to respond to acts of terrorism.

The Fire Bureau conducted our first in-house Fire Officer I class. Eight members of the Fire Bureau were certified as Fire Officer I.

Our goals for 2003 include the following:

Obtaining National Fire Service Accreditation.

Revamping our fire reporting and record keeping system.

Continued upgrading of terrorism response capability.

A handwritten signature in black ink, appearing to read "Donald H. Konkle", is written over a horizontal line.

Donald H. Konkle
Fire Chief

Harrisburg Bureau of Fire

Mission Statement

The Harrisburg Bureau of Fire exists to serve the City of Harrisburg, and when needed, the greater Harrisburg metropolitan area by providing effective fire suppression, emergency medical services, tactical rescue, Urban Search and Rescue, water rescue, hazardous materials response, fire prevention, fire codes enforcement, and public safety education.

The Bureau of Fire is a team of highly motivated diverse individuals dedicated in common to public interaction and providing efficient services. This involves the use of modern fire and rescue equipment, integrated up-to-date training and safety techniques, computer technology, and cooperation with surrounding fire, rescue and EMS agencies . to provide the best service available by making public safety and protection our perpetual primary priority.

FIRE BUREAU SERVICES

The primary responsibility of the Fire Bureau is the protection of life and property from fire, man made and natural disasters. The suppression of fire involves arriving at the scene as quickly as possible so as to attack the fire at the point of origin and prevent its spread. Fire apparatus responds from four fire stations.

The Fire Inspection Unit, created in 1989, acts to reduce fire loss through inspections and code enforcement, using a city fire code that is considered a national model in fire safety. To achieve this goal, the Fire Inspection Unit reviews, approves and verifies the following for private and public structures: building plans, fire alarm plans, smoke detector plans, standpipe system plans, fire pump system plans and sprinkler system plans. New construction sites are also reviewed to assure that life safety components are installed properly. This unit performs all fire code inspections of properties including, but not limited to, electrical, structural, smoke detectors, and general housekeeping to determine housing code violations. In commercial units, inspections are performed to verify the safety of fire extinguishers, sprinkler systems and smoke detectors. Reinspections are performed to assure that fire safety regulations are being upheld once a violation of the Fire Prevention Code is reported or to follow up after an actual fire incident. This unit also participates in numerous seminars and demonstrations related to fire safety techniques such as the installation of sprinkler systems and smoke detectors.

Fire Safety education is another responsibility of the Fire Bureau. Through well-planned, year-round fire programs, the Fire Bureau educates the public about fire and burn hazards, how to prevent fire and burn injuries due to individual carelessness, how to survive a fire once it starts, and how to treat a burn injury properly. The fire prevention program covers the homes, the schools, the workplace and the community.

By Mayoral designation, the Fire Bureau also operates as the Emergency Management Agency for the City of Harrisburg, and the Fire Chief has been designated by the Mayor as Emergency Management Coordinator. This agency maintains the Emergency Operations Plan (EOP), which sets forth a procedure to alert the public and provide information and appropriate

protective action instructions, as needed. The Pennsylvania Emergency Management Agency has cited the Harrisburg plan as a model for municipalities in the State. This plan also provides for the coordination and use of available municipal resources during a natural or human-caused emergency or disaster. It defines the roles and responsibilities of municipal officials and the Emergency Management Coordinator. The plan also assures coordination and cooperation with county efforts in accordance with the Dauphin County EOP. Annually, representatives from the Federal and Pennsylvania Emergency Management Agencies evaluate a drill of the City's EOP.

The Fire Bureau has a comprehensive training apprenticeship program designed to incrementally certify firefighters through certification so they may advance to the next rank. This program includes practical hands-on training and classroom instruction leading to appropriate testing for certification. Harrisburg is the first municipality in Pennsylvania to establish such a comprehensive program.

The Special Hazard Advances Rescue Personnel (SHARP TEAM) program, begun in 1992, increases the Fire Bureau's ability to respond to incidents requiring heavy, special, or technical rescue such as structural collapse, trench rescue, confined space rescue, high/low angle rescue, or heavy vehicle extrication. This is accomplished by intensive training of personnel and the purchase of specialized equipment.

The Rescue One Unit is the product of a series of major innovations and advances, making the Harrisburg Fire Bureau one of the premier firefighting and rescue operations in the state and nation. The Rescue One Unit is a part of Pennsylvania Task Force I, a designated Urban Search and Rescue Team of the Federal Emergency Management Agency. Only 25 such teams exist nationwide and each is available for mobilization in response to any national emergency. The 18 member unit has received more than 300 hours of advanced technical training which is supplemented by the unit's continuing education program and periodic drills.

The Fire Bureau has begun the self assessment process involved with a Fire Service Accreditation through the Commission of Fire Accreditation International. Harrisburg is the only professional fire department in Pennsylvania seeking to attain this goal. The self assessment process will be completed in January 2001.

History of Harrisburg Bureau of Fire

Organized fire protection in the City of Harrisburg finds it's birth in the year 1791. When a number of the leading citizens of the newly formed borough organized the Union Fire Company and pledged to man the borough owned hand pumper during times of need. For the next 70 years as the borough grew at least ten more volunteer fire companies would form. Some would grow with the town, some would disband and some would reorganize. By 1860, the year Harrisburg became a city, fire protection consisted of the Friendship, Hope, Citizens, Paxton, and Good Will engine companies all having hand operated pumpers in their charge; the Washington Hose Company, formed after the water system was installed in 1841, a hose carriage in their possession; and the Mt. Vernon Hook & Ladder company organized in 1858 after a disastrous fire made it imperative that ladders were needed at a fire.

In the next fifty years, eight more volunteer fire companies: the Mt. Pleasant, Lochiel, Susquehanna, Reilly, Shamrock, Allison, Camp Curtin and Royal, would form as the city expanded it's boundaries. They took on the varying roles of engine, hose and ladder companies depending on their locale and services needed. Pulling engine by hand gave way to horse power, steam fire engines replaced the old "hand masheens", a new way of sounding alarms was installed in 1874 called a Gamewell fire alarm system, and the enlarged Harrisburg Fire Department came under the control of a Chief Engineer.

In 1914, the city hosted one of the largest State Firemen's Conventions ever held. In that year, the city fathers began replacing the horses with motor driven apparatus and also began paying drivers directly (previously they were all paid by the companies). City government was reorganized and the Fire Bureau was born. Within the years the last two companies were admitted to the Bureau-the Riverside and Pleasant View.

By the 1960's, a noticeable change was occurring in that volunteer turnout was visibly lacking at fires. Like a lot of American inner cities, Harrisburg was decaying and along with this decay came a tremendous rise in fire activity. The call volume increased dramatically along with arson and building fires. The workload shifted to the career firemen.

In the two hundred, ten year history of the Harrisburg Fire Bureau, well over 100,000 alarms have been answered with a high percentage occurring in the past 30 years. Noteworthy incidents include the Capitol fire (1897), Lochiel Train Wreck (1905), Grand Opera House (1907), Floods of 1889, 1936, 1972, and 1996, Civil Disturbances of 1968 and 1969, TRW (1985), and Vernon Industrial (1990), but this is but a mere footnote in the voluminous record of fires and incidents, of which a large amount were serious, expensive and tragic.

The Fire Department is extremely proud of the fact that it has given aid outside the City to those in need from time to time. Over the past two centuries, city apparatus and manpower has responded countless times to the call for assistance within the suburban and regional area. But there were also times when aid was sent far away. Some of the more noteworthy incidents occurred in 1904, when the Hope Engine No. 2 traveled by rail to Baltimore to help fight the devastating conflagration that leveled block after block. In 1937, eighteen members and the Friendship Engine 1 spent a week in Louisville, KY on flood duty. And on September 11, 2001, seventeen members making up part of the Pa Task Force 1, assisted the hard pressed FDNY in searching the ruins of the World Trade Center disaster for survivors, then returning two weeks later.

By the turn of the new millennium, the Harrisburg Fire Bureau has evolved into a force of 100 highly trained and motivated career firefighters manning six companies in a city that has made a vibrant and tremendous comeback from the dark days of near bankruptcy of the early 1980's. But there are still vestiges of the "good ole days". Two of the old volunteer companies exist. And to preserve the fire department's rich heritage, the city restored the old Reilly No. 10 house to the PA. National Fire Museum for all too enjoy.

**City of Harrisburg
Bureau of Fire
Training and Safety Division**

**Timothy W. Sevison
Deputy Chief
2002 Annual Report**

2002 was a very active year for members of the Fire Bureau. Events from the previous year, as well as new equipment purchases created new training requirements in order to maintain the highest level of preparedness.

Accomplishments for the Fire Bureau Training Program include completion of the Third Class City Fire Officer Academy, which had students representing four (4) cities, implementation training in accordance with NFPA standards for two (2) new aerial apparatus, training for all operational personnel on mass casualty decontamination procedures as well as other specialized operations training.

The Third Class City Fire Officer Academy was comprised of 21 students from four (4) cities. It is a 10 month long program involving 100 hours of classroom study, and an additional 80 hours of home department work. Upon successful completion, students were certified as Fire Officer I through the State Fire Academy.

The Fire Bureau took delivery of two (2) KME Tower Ladders in 2002. A training plan was developed in accordance with NFPA 1002 to ensure all personnel were competent in the operation of these apparatus. This training plan consisted of eight (8) hours of training in three (3) modules. Module I, nomenclature and specifications, Module II, Closed Course Driving and Operation, Module III, Street Driving.

Although all Harrisburg Firefighters had received the National Fire Academy Emergency Response to Terrorism course in 1999, it was determined that additional training was required in the post 9-11 world. Working with the South central Counter terrorism Task Force, a guideline was developed for Engine Companies for Mass casualty Decontamination. All personnel were provided with training on the procedures outlined in this guideline, as well as specific training on chemical protective equipment and basic detection and monitoring equipment. Many of these personnel also participated in joint training with Harrisburg Hospital on Mass Casualty Decontamination.

The Fire Bureau Safety Program provided safety related training to Fire Bureau personnel, as well as personnel from other city agencies, and outlines the inspection and maintenance criteria for fire bureau tools, equipment and apparatus.

The Fire Bureau outsourced fleet maintenance to a private vendor in 2002, ending a long history of employing Fire bureau mechanics. This was primarily due to the ever increasing sophistication of fire apparatus, and the need to ensure the safety of firefighters and civilians in the operation of these vehicles.

While fleet maintenance was outsourced, additional inspection and maintenance requirements were assigned to Fire Bureau Officers and members, in order to ensure the safety of firefighters relying on this equipment operating properly.

The Joint Training and Safety Board continues to be a tremendous asset to the Fire Bureau through committee oversight and recommendations.

JTSB members include:

Donald Konkle, Fire Chief
Daniel Soulier, Deputy Chief
Alan Kumpf, Captain
James McHenry, Lieutenant
Rob Sullivan, FF/DO

Timothy W. Sevison, Sr. Deputy Chief
Daniel Hartman, Battalion Chief
Mike Horst, Lieutenant
Jeff Snyder, FF/DO

Training

The Master Training Plan of the Harrisburg Bureau of Fire encompasses the Career Development Program, the Platoon based Proficiency Training Program, Company Drills and required Certified Training in order to meet Bureau and industry standards.

The following Officers are responsible for the day to day coordination of the Proficiency and Apprenticeship training.

Lt. Horst	Lt. Bair	Lt. Pelton	Lt. Murray	Lt. Eiceman
Lt. McHenry				

Safety

The Safety Program of the Harrisburg Bureau of Fire incorporates Inspection, Maintenance and Testing of vehicles and equipment. In addition, the Bureau requires annual training in various categories, to include, SCBA Fit Testing and Drills, Haz-Mat Operations Training, Infectious Disease Training and Company SOG review.

The following Officers are responsible for the areas listed:

Captain Berger

Fire Pumps

This includes the annual certified testing of Fire Bureau pumping apparatus as well as portable pumps.

Captain Blessing

Ground Ladders

This includes the annual certified testing of Fire Bureau ground ladders, as well as coordination of the monthly inspection and maintenance requirements.

Captain Kumpf Captain Hedrick	<u>Fire Hose, Nozzles and Appliances</u> In addition to repair and maintenance of all fire hose, nozzles and water delivery appliances, this includes the annual certified testing of all fire bureau hose.
Lieutenant Horst	<u>Mask Service Unit</u> The Mask Service Unit provides full service maintenance, testing and repair to Fire Bureau breathing apparatus, cascade systems and compressors. In addition, it assists with annual SCBA fit testing. There are seven (7) SCBA technicians assigned to the four (4) Platoons.
Lieutenant Murray	<u>Medical Equipment</u> The Fire Bureau provides BLS and AED capabilities on vehicle accidents and AED responses. This position involves ensuring medical equipment is inspected and inventoried on a regular basis.
Lieutenant McHenry	<u>Ropes and Rigging Equipment</u> The Fire Bureau owns and maintains over 3000 feet of rescue rope as well as thousands of dollars worth of rope rescue hardware. This position involves the cleaning, inspection and history documentation of rescue rope and related hardware.
FF. Simmons	<u>Water Rescue Equipment</u> This position involves coordinating inspection, maintenance, repairs and storage of the Fire Bureau boats and related water rescue equipment.
FF. Chesbro	<u>Communications Equipment</u> This position involves the coordination of repair and maintenance to mobile and portable radios, intercom communications systems, and alpha-numeric paging systems.
Captain Kumpf	<u>Small Engine/Powered Equipment</u> This position involves the coordination of repairs to fire bureau small engines and ancillary powered equipment.

The following pages list the accomplishments of the Fire Bureau Training Program for the year 2002.

Total hours dedicated by Fire Bureau personnel towards training in 2002 are:

Actual Hours *2,507.3*

Manhours *14,057*

The following is a breakdown of Fire Bureau Training.

Platoon Based Training

This is training delivered while members are on-duty, regularly assigned to an operational Platoon. This training can encompass Proficiency Training, Career Development Training, Certified Training and Drill/Evaluation.

<i>Actual Hours</i>	<i>Manhours</i>
733.3	7,339.

Formal Outside Training

This is training that members elect to take through a variety of educational institutions, and on a variety of Emergency Service related topics.

<i>Actual Hours</i>	<i>Manhours</i>
428	560

Career Development Training

This is training delivered to members, either through internal instruction, or through assignment to an educational institution. This training directly relates to a members career progression.

<i>Actual Hours</i>	<i>Manhours</i>
367	1597

Hazardous Materials Team Training

This is Technician level training provided jointly through the Fire Bureau and the Dauphin County Emergency Management Agency for participating members of the Haz-Mat Response Team.

<i>Actual Hours</i>	<i>Manhours</i>
176	644

Rescue #1 Training

This is Technician level training provided to members of the Fire Bureau Technical Rescue Team (Rescue #1), which is also the sponsoring agency for Pennsylvania Task Force One, of the National US&R Response System.

<i>Actual Hours</i>	<i>Manhours</i>
643	3691

Outside Training Provided

This is training provided to non-fire bureau, or non-city agencies by the Fire Bureau and its members.

<i>Actual Hours</i>	<i>Manhours (Instructor)</i>
